HARDENING CABINETS | AGB IC

Infrico delivers fast hardening and reliable storage, preserving perfect texture and product quality. Featuring a high-precision touchscreen controller, these units ensure accurate temperatures down to -40°F. Built with an AISI 304 stainless steel interior, LED lighting, and a hygienic design, they offer durability, efficiency, and easy cleaning. Equipped with 3 stainless steel shelves and tray slides per section, plus a sensor that stops air circulation when the door is opened, and a heated frame to prevent ice buildup. With self-closing operation, alarms, and robust construction, they are designed for demanding professional environments.
