INNOVATION: SUPERCOOLING TECHNOLOGY

The Supercooling phenomenon consists of cooling liquids below its freezing point, and maintaining it as a stable liquid state, without it freezing.

Our state-of-the-art Super Coolers keep drinks between 0° and -10°. They will freeze your mind!

An innovation for the Horeca market, and that we at Infrico want to present to you.

With state-of-the-art technology, this equipment represents a qualitative leap in industrial cooling, since it works below zero degrees without freezing beverages or solids.

Give your establishment an elegant and sophisticated touch with our SPC501 equipment, in the Inox and Blackrange. Developed by our R+D team and designed for any type of environment.

APPLICATIONS AND FEATURES

A new experience for the client: the coldest drinks in the world.

- Longer shelf life of beverages.
- Reduction of losses due to expiry date.
